

STATEMENT OF PROFESSIONAL ETHICS FOR AI POLICY
(2021)

I recognize that AI systems may impact the opportunities and rights of others.

I recognize that bias is an ongoing challenge in the design and use of AI systems.

I recognize that AI systems may pose a risk to public safety.

I will work to ensure that AI systems are fair, transparent, and accountable.

I will work to ensure that AI systems protect fundamental rights, the rule of law, and democratic values.

I will work to ensure diverse perspectives are represented in discussions about AI policy.

I will provide advice about AI systems that is objective, fair, and well-supported.

I will reveal any conflicts of interest that may influence my recommendations.

I will continue to review emerging issues in AI policy to ensure that my advice reflects the best information available to me at the time I make an assessment.

I will work to ensure that AI systems are human-centric and trustworthy.
