# MISSION

The **Center for AI and Digital Policy (CAIDP)** aims to ensure artificial intelligence and digital policies promote a better society, more fair, more just, and more accountable – a world where technology promotes broad social inclusion based on fundamental rights, democratic institutions, and the rule of law.

CAIDP is a global independent non-profit focused on **research, education, advocacy and advisory**. CAIDP trains AI policy advocates, researchers, and practitioners across 60+ countries. With intensive training for future leaders in AI policy worldwide and promotion of collaboration among scholars through a Global Academic Network, CAIDP maintains a global research network.

CAIDP provides AI policy advice to national, international, and supranational organizations, and currently serves as an expert advisor on AI policy to the OECD, UNESCO, European Union, the Council of Europe, the Global Partnership on AI, and other leading organizations.

CAIDP organizes advocacy campaigns and events and collaborates with other civil society organizations and academic institutions to advance its mission and amplify the work of community organizations. Public comment and engagement are enhanced by tracking Public Voice opportunities globally and sharing within our network.

# PROGRAM AND ACTIVITIES

## EDUCATION & RESEARCH

- Train future AI policy leaders (**AI Policy Clinics**)
- Educate law students on AI policy (**Externships**)
- Build advanced policy research and analysis skills (**Fellowships**)
- Build a network of global academic scholars to promote collaboration (**Global Academic Network**)
- Build thematic webpages on key AI policy frameworks

## ADVISORY

- Publish annual comparative analysis on national AI strategies and practices (**Artificial Intelligence and Democratic Values Index**)
- Advise national governments and international organizations on AI policies and practices
- Publish commentaries and position papers on AI policy (**Statements**)
- Publish weekly global AI policy newsletter, which reached 13k subscriptions in 2022 (**CAIDP Update**)

## ADVOCACY

- Support AI initiatives, projects, and campaigns that safeguard the rule of law, democratic institutions, and fundamental rights
- Bring journalists, activists, policy experts, the public, and our network together for policy discussions in our monthly (**CAIDP Conversations**)
- Partner with other civil society organizations around the world with similar goals
- Amplify public consultation and engagement opportunities for AI policy (**Public Voice**)
- Provide education and advocacy updates on LinkedIn, for our more than 10k followers
- Create online collaboration space for Research Group participants and Academic Network to support deeper policy discussions and collaborative projects, emphasizing diverse perspectives from Global South.

## CAIDP Research Group

CAIDP works to educate future leaders in AI policy around the world. In 2021, CAIDP launched the first AI Policy Clinic, an intensive introduction to the world of AI policy. The participants conduct research and policy analysis and also develop presentation skills. The **Research Group** provides the basis for the CAIDP's policy work. AI policy advocates, researchers and practitioners can apply for the semester-long, free of charge, **AI Policy Clinic**. Each semester, the accepted applicants form the new cohort of the CAIDP Research Group. Research Group members identify significant AI Policy News, locate public voice opportunities, examine emerging trends in AI Policy, assess country AI policies and practices and present their analysis to the cohort.

Research Group members who successfully complete the first Clinic and pass the certification test become eligible for the **Advanced AI Policy Clinic**. These Team Leaders coordinate research group activities, prepare “5 Key Points” presentations, and develop advanced AI policy skills. At the end of the Clinic, students receive the *CAIDP AI Policy Certification* with successful completion of a comprehensive multi-part test.

Applications for the AI Policy Clinic are open to AI policy researchers, advocates and practitioners worldwide. The **Research Group** currently represents AI policy advocates, academics and practitioners from more than 60 countries. CAIDP works to ensure AI policy education is available, accessible, and free of charge, and that it creates opportunities for the members to advance their work in their respective communities.

## The CAIDP AI Policy Certificate

**CAIDP** has launched a comprehensive certification program for AI Policy. The certification program is an outgrowth of the work of the Research Group, and includes requirements for research, writing, and policy analysis. Receipt of the *CAIDP AI Policy Certification* requires completing a detailed multi-part test. The subjects are AI History, AI Issues and Institutions, AI Regulation, and Research Methods. Candidates must also sign a Statement of Professional Ethics for AI Policy. CAIDP Certificates are available for:

- Artificial Intelligence Policy
- Artificial Intelligence Policy - Advanced
- Artificial Intelligence Policy Seminar

CAIDP has also launched the first code of professional ethics for the field of AI policy. The goal is to ensure that those who provide advice regarding AI policy commit themselves to a high level of professional conduct. The **CAIDP Statement of Professional Ethics** recognizes that AI systems impact the rights and opportunities of others, may pose a risk to public safety, and that bias is an ongoing challenge. The Statement requires individuals to ensure that AI systems are fair, accountable, and transparent among other obligations. Endorsement of the **Statement of Professional Ethics** is necessary to receive the **CAIDP AI Policy Certificate**.

## CAIDP Fellowships

CAIDP recognizes the academic success, ongoing engagement and extraordinary contributions of its AI Policy Clinic participants. The Program Committee identifies the candidates for fellow designation and recommends to Board of Directors. The designation is determined by a vote of members of the Board of Directors. Fellows take additional research and leadership responsibilities.

## CAIDP Externships

CAIDP provides the opportunity for full-time students in law or public policy to work with CAIDP during the Semester for **academic credit**. Typical externships include intensive work in AI policy research and analysis and the opportunity to connect with experts and leaders in the AI policy field.

CAIDP has recently partnered with **Duke Law School, Georgetown Law, Harvard Law School, Stanford Law School, Campbell Law School, TU Wien and University of Vienna** for externship opportunities. We welcome other partnerships. Interested applicants should send a letter of interest, a CV, and a relevant writing sample to [Marc Rotenberg](#). Institutions may also contact Marc for further information about the program. Listings in Externship Directories are appreciated.

## CAIDP Publications and the CAIDP Update

The **Center for AI and Digital Policy** makes freely available to members of the **Global Academic Network** CAIDP publications, including ***The AI Policy Sourcebook*** and ***Artificial Intelligence and Democratic Values Index***. The **CAIDP** also promotes the publications of members of the Global Academic Network.

In 2021 several members of CAIDP contributed to the special anniversary edition of the *Turkish Policy Quarterly* on ***Artificial Intelligence and Democratic Values***.

We continue to publish our weekly **CAIDP Update newsletter** to provide timely information about global AI Policy developments. *CAIDP Update* also includes global Public Voice opportunities, highlights from Global Academic Network members, CAIDP's own campaigns and recent statements.

Members of CAIDP actively publish AI policy articles regarding the impact of AI systems on human rights, democratic institutions, and rule of law in both academic and news platforms.

Center for AI and  
Digital Policy

### CAIDP Update 5.01

Reflecting on the Year in AI: Top Moments and Insights from 2022

January 9, 2023

Hello and welcome to the first newsletter of the year from the Center for AI and Digital Policy! In this issue, we'll be reflecting on some of the top moments and insights from the past year in the world of AI.

We'll be taking a look back at some of the major developments in the field, highlighting key trends and emerging technologies that we believe will shape the future of AI.

We hope you find this newsletter informative and thought-provoking, and we look forward to continuing the conversation with you throughout the year. Thank you for your interest in the Center for AI and Digital Policy!

Digital Policy

## Global Academic Network

CAIDP launched the **Global Academic Network (GAN)** in 2021. The Global Academic Network builds on the expertise of the CAIDP Team members, the work of the CAIDP Research Group, and the opportunity to collaborate with AI Policy research institutions around the world.

The CAIDP Global Academic Network now includes 45 leading experts in AI policy from 25 countries. The members of the GAN help guide the work of CAIDP, providing advice and direction and also reviewing CAIDP program activities.

The **Global Academic Network** is established to:

1. Promote well-informed AI Policy and cutting-edge research
2. Provide high-quality resources to those working in the field of AI Policy
3. Promote collaboration among those working in the field of AI Policy
4. Identify emerging issues in the area of AI Policy
5. Enable networking opportunities for those in the area of AI Policy
6. Establish ethical standards for AI Policy

## Resources

CAIDP contributes to better understanding of major AI policy frameworks by developing thematic pages. Research Group members, as part of their educational activities, research and synthesize authoritative resources on these frameworks. Each page includes the main institution's (for example Council of Europe or NAIAC) own institutional documents, background reference materials, CAIDP Statements and published work on the subject, news items, events, and other civil society activities.

## CAIDP Policy Events and Conversations

CAIDP hosts monthly Conversations, live virtual interviews, with leading thinkers, artists, and policymakers in the AI realm. 2022 CAIDP Conversations featured **Anu Bradford**, **Renée Cummings**, **Keith Sonderling**, **Liza Lin & Josh Chin**, and **David Sanger**. 2021 interviews included **Shalini Kantayya**, **Cade Metz**, **Gregor Strojín**, **Ken Regan**, and **John Podesta**.

CAIDP also organized panels in many international conferences to bring policymakers, academics, and civil society together to discuss AI policy issues related to fundamental rights, democratic values, and rule of law. In 2022, CAIDP hosted a panel at the conference on Computers Privacy and Data Protection (CPDP) with CAIDP Research Director Merve Hickok as the moderator, and with panelists **Brando Benifei** (MEP & Co-Rapporteur), **Gregor Strojín** (CAHAI), **Sarah Chander** (EDRI), **Doaa Abu Elyounes** (UNESCO).

Merve Hickok and CAIDP President Marc Rotenberg also spoke at Global Privacy Assembly in Istanbul, launching the facial surveillance ban campaign. In 2021, Merve Hickok's moderated another panel in CPDP with MEP **Alexandra Geese**, **Peggy Valcke** (Vice-Chair of CAHAI), **Friederike Reinhold** (AlgorithmWatch), and **Oreste Pollicino** (Italian member of the OECD Global Partnership on Artificial Intelligence).

CAIDP routinely holds policy events with leading AI policy experts. In November 2021, CAIDP hosted a policy event on **AI and Democratic Values** with Groupe d'études Géopolitiques, Ecole Normale Supérieure, Paris for #ParisAIweek. Featured speakers included Gilles GRESSANI, Groupe d'Etudes Géopolitiques, Ecole Normale Supérieure; Gabriele RAMOS, Assistant Director-General for Social and Human Science, UNESCO; Andrew W. WYCKOFF, Director of Science, Technology and Innovation, OECD; Leyla KESER, Dean, Istanbul Bilgi University and CAHAI Advisor; Juha HEIKKILA, Advisor for Artificial Intelligence, European Commission, DG CONNECT; Gianclaudio MALGIERI, Associate Professor of Law & Technology at the EDHEC Business School in Lille (France); Ella JAKUBOWSKA, Policy Advisor, EDRI; Edward SANTOW, Professor, Responsible Technology, University of Technology Sydney; Former Chair, Australian Human Rights Commission; Félicien VALLET, AI Lead, Commission Nationale de l'Informatique et des Libertés, Office of the UN High Commissioner for Human Rights; and, Victor STORCHAN, Member, Groupe d'Etudes Géopolitiques, Ecole Normale Supérieure; Vice-President, AI ML Lead, JP Morgan Chase & Co.

## The Public Voice

The **Center for AI and Digital Policy** routinely identifies opportunities for public comment on AI policy posted by government agencies worldwide. We strongly advocate for meaningful participation opportunities for members of the public in policy discussion and development. We educate Research Group members on how to locate these opportunities, encourage them to participate and amplify the opportunities in their own communities, and we assist in the drafting of effective comments.

## ACCOMPLISHMENTS

### “Artificial Intelligence and Democratic Values Index”

CAIDP’s flagship report – **Artificial Intelligence and Democratic Values Index** measures progress toward AI policies that safeguard human rights and the rule of law. The **AIDV Index** bridges the gap between policies and practices with fact-based evaluations of individual countries, and ratings and rankings to compare countries and evaluate trends over time. In February 2022, CAIDP published the second edition of the Index and global ranking of countries, based on national AI policies and practices.

The **AIDV Index**, developed by CAIDP, is based on global norms found in the OECD/G20 AI Principles, the Universal Declaration of Human Rights, and the UNESCO Recommendation on AI Ethics. Policies and practices were evaluated for 50 countries. There was also a careful analysis of AI-related developments in 2022 at international organizations, including the G7 and the G20, the European Union, and the Council of Europe. The report reflects the contributions of more than 100 experts and advocates from almost 60+ countries. CAIDP will publish the third edition of the Index in April 2023, expanding its analysis to national AI policies and practices of 75 countries.

The 600-page report sets out key recommendations to guide policymakers and the public toward the goal of ensuring AI systems that respect human rights, democracy, and the rule of law:

- 1) Countries must establish national policies for AI that implement democratic values
- 2) Countries must ensure public participation in AI policymaking and also create robust mechanisms for independent oversight of AI systems
- 3) Countries must guarantee fairness, accountability, and transparency in all AI systems
- 4) Countries must commit to these principles in the development, procurement, and implementation of AI systems for public services
- 5) Countries must halt the use of facial recognition for mass surveillance

In the second edition of the report, CAIDP set out three new recommendations:

- 6) Countries must curtail the deployment of lethal autonomous weapons
- 7) Countries must begin implementation of the UNESCO AI Recommendation
- 8) Countries must establish a comprehensive, legally binding convention for AI

The report was released with an accompanying debate with AI policy leaders from European Parliament; Professor **Eduardo Bertoni**, Inter American Institute of Human Rights; **Jibu Elias**, National AI Portal of India; **Fanny Hidvegi**, Access Now, European Policy Manager; and Professor **Stuart Russell**, University of California Berkeley.

The report was also featured in *AI Decoded*, *Digital Bridges*, *the Council of Foreign Relations*, *the Korea Herald*, and other publications.

## CAIDP AI Policy Clinic Graduates

CAIDP values diversity and inclusion, and the variety of experiences and perspectives across different cultures and contexts. We also recognize AI policy training is not available, accessible, or affordable to all communities around the world. **CAIDP is committed to provide semester-long, free of charge virtual education globally.**

By end of 2022, CAIDP has graduated four separate cohorts of students, and awarded certificates for **AI Policy**, **AI Policy Advanced**, and the **AI Policy Seminar**. Cumulative numbers as of the end of 2022 are:

- AI Policy Clinic attendees: **296**
- AI Policy Clinic graduates: **207**
- Advanced AI Policy Clinic graduates: **38**
- AI Seminar graduates: **7**
- Externs: **18**
- Countries represented in the CAIDP AI Policy Clinics: **61**

## CAIDP Statements

In 2021 and 2022, **CAIDP** provided comments on AI policy to the many national governments and international organizations. CAIDP Statements emphasize support for democratic values, fundamental rights, and the rule of law. All statements are available on the CAIDP website. The **CAIDP** provided comments on AI policy to the following national governments and international organizations:

- The US Congress
- The US National AI Advisory Committee (NAIAC)
- The US National Security Commission on AI
- The EU-US Trade and Technology Council (TTC)
- Council of Europe, Ad Hoc Committee on Artificial Intelligence
- The Organization of American States
- The European Parliament
- The European Commission

- The European Commission
- The OECD
- The G20 & The C20
- The Government of Colombia
- The African Commission on People and Humans Rights
- The State Internet Information Office of China
- The UK Parliament
- UK Department for Digital, Culture, Media and Sport
- The US AI Task Force
- US Office of Management and Budget
- The US Attorney General
- The US Office of Science and Technology Policy

**CAIDP** launched the *Ban Facial Surveillance Technology* campaign, and joined civil society organizations for the following initiatives:

- The ReclaimYourFace Campaign
- The Athens Roundtable AI Manifesto
- The Athens Roundtable AI Manifesto on the Enforcement of Law

**CAIDP** also published a statement concerning Ukraine, writing in part:

As an organization established to defend fundamental rights, democratic institutions, and the rule of law, we condemn this blatant violation of international law. This is an act of aggression against a sovereign, independent, and peaceful country.

We urge all nations to make clear their support for Ukraine. We also stand with international organizations in the field of digital policy, including the OECD, the Council of Europe, the European Union, and UNESCO, that have opposed the Russian invasion of Ukraine.

## CAIDP Partnerships

CAIDP is pursuing a wide range of projects on Artificial Intelligence policy with critical partners, including:

- Council of Europe Committee on AI (Observer)
- Global Partnership on AI (Data Governance)
- OECD AI Group of Experts
- UNESCO Recommendation on AI Ethics (NGO liaison committee, implementation)
- European Parliament (EU AI Act)
- ABA Rule of Law Initiative
- ACM AI Policy Committee
- Council on Foreign Relations (AI education modules for World 101)
- European Law Institute (Model Rules on Impact Assessment of ADMs Used by Public Administration)
- G7 2022 (German Presidency), G20 2022 (Indonesian Presidency)
- International Working Group on Data Protection (Facial Surveillance, Smart Cities)
- European Digital Rights Initiative
- Carnegie Council for Ethics
- Encode Justice
- Anti-Trafficking Initiative of Loyola Law School

# ACCOLADES

## Reviews of AI Policy Clinics from Participants

[www.caidp.org/about-2/kudos/](http://www.caidp.org/about-2/kudos/)

Three months full of AI Policy finally came to an end. I am happy to share that, after being a member of the **Center for AI and Digital Policy's** AI Policy Research Group since September, a presentation, and a final exam, I obtained my certificate, with distinction.

I want to thank **Marc Rotenberg**, **Karine Caunes**, and **Merve Hickok** for their efforts in bringing such a fantastic cohort of people together and preparing an eye-opening as well as a highly multi-faceted syllabus.

I highly recommend the program to everyone who works or is willing to work in the field of AI policy.

I am happy to share that I completed the 2022 AI Policy Clinic offered by the **Center for AI and Digital Policy** and graduated with distinction.

The experience was one of a kind. I got to advance my skills in Policy research and analysis and engage with great minds in the field. I cannot wait to engage further as a team leader in the 2023 Spring Advance AI Policy Clinic.

What stood out to me about CAIDP, was the inclusiveness of the community. I've been in places where people don't talk to me or even look at me because of my colour, or my job title's not senior enough for them. The leaders of CAIDP's policy clinic, **Marc Rotenberg**, **Karine Caunes**, **Merve Hickok**, and the team leaders, didn't care about that. They were welcoming, generous with their knowledge, and set a fantastic example for the group.

The holistic curriculum amalgamated technical and policy discussions of the most important AI Ethics frameworks <https://lnkd.in/dCHC4Q83> that guide the adoption of AI around the world. The identification of AI significant policy news <https://lnkd.in/dHJHpb8w>; Public voice opportunities <https://lnkd.in/ecYu2Gcd>, and participation in the formulation of AI policy statements to government bodies, <https://lnkd.in/d6B9tvey> prepared us for the ultimate assessments: a final examination and a country report analyzing AI policies and practices in selected countries, under the light of the CAIDP AI and Democratic Values Index <https://lnkd.in/d7PJFqhd>

I am elated to share that I have completed the AI Policy Clinic certification with the **Center for AI and Digital Policy** (CAIDP). The AI Policy Clinic is a semester-long intensive, interdisciplinary course established to teach future leaders AI policy analysis, research, and evaluation. The course covers AI History, AI Issues and Institutions, AI Regulation, and Research Methods.

Four months, many interesting discussions and even more insightful presentations, as well as one AI policy report later, I am happy to share that I have successfully completed CAIDP AI Policy Clinic.

12 weeks flies so fast if the time is well spent and worth your while. I'm ecstatic to have graduated from the **Center for AI and Digital Policy** (CAIDP) intensive programme on #ai policy clinic. I am grateful and appreciative of **Marc Rotenberg**, **Merve Hickok**, **Karine Caunes**, **Guiliano Borter**, **Larissa Zutter** and the rest of the instructors at CAIDP for this wonderful experience on the path to understanding #artificialintelligence policy analysis. This couldn't have come at a better time for me as I'm presently a member of **NITDA Nigeria's** National AI Volunteer Expert Group. [#responsibleai](#) [#aiethics](#) [#trustworthyai](#)

I'm so glad to share with you two pieces of news related to **Center for AI and Digital Policy #CAIDP** that actually excited me and are proof that you only need to be disciplined enough and love enough something in order to have results beyond you expected.

The first one is that I was certificated by CAIDP in the AI policy clinic and the second and most important news is that I was admitted as TEAM LEADER in their AI Policy Clinic Spring 2023 this for me is huge because I'm not a lawyer and my main work isn't related to it, I'm just a person passionate enough and dedicated enough to the topic to know exactly what's going on ... so we finish 2022 knowing that 2023 will be another step forward in my AI career

It has been several months of hard work, leading a team of researchers in Artificial Intelligence Policy. The instructors and support team at **Center for AI and Digital Policy** have always been amazing and good at their job. I am grateful for the opportunity.

Last week I was awarded **Center for AI and Digital Policy's #Advanced #AI #Policy** Clinic certificate - a culmination of my engagement as a Team Leader. It was an honour having the esteemed **Gabriela Ramos** from **UNESCO** (ADG/SHS) as our graduation keynote speaker: "it's not just about outcomes and technologies but also who are we building the future with, what process do we have in developing it, driving societal transformation, diversity, sustainability and human dignity".

Read more about UNESCO Recommendations on the Ethics of AI: <https://lnkd.in/ezeaaYpZ>

As part of the clinic, I studied AI policy frameworks that are shaping international norm for the use of AI. I researched significant AI policy news and evaluated national AI policies of countries around the globe.

I learned about digital policies from esteemed colleagues from 61 countries representing Africa, Asia, Europe, Latin America, and North America and had the support of incredible instructors, team leaders, and teaching fellows. A huge thank you to the CAIDP for selecting me for this phenomenal clinic.

**Center for AI and Digital Policy**, thank you for such a great opportunity to learn about Artificial Intelligence and Policy. The policy clinic has been an amazing learning experience from identifying significant AI policy news, researching on AI and the public voice to contributing to the AI and Democratic Values Index Report.

Through this journey, I learnt a lot about AI policy in the Kingdom of Bahrain

## Reviews of “AI and Democratic Values Index”

*“A very worthwhile analysis.”*

- Stuart Russell, University of Berkeley, California

*“This report is unique in that it compares AI policies and practices around the world and should inspire progress toward trustworthy and human-centric AI. The report also documents the important role of digital rights and consumer groups in this endeavor.”*

- Ursula Pahl, European Consumer Association (BEUC)

*“In this historical moment of global interest negotiation and competition on AI we are in right now, we urgently need a shared narrative serving the human interest and democracy. With its comprehensive overview of key global and local power actors and initiatives. **The Artificial Intelligence and Democratic Values Index** is an essential instrument for the facilitation of this shared global dialogue on AI now and in many years to come.”*

- Gry Hasselbalch, DataEthics.eu, InTouchAI.eu

*“It's rare to read a document that has the potential to influence national policies on artificial intelligence around the world. The country descriptions and evaluations are thoughtfully organized, well-written, and carefully documented. The country rankings enable readers to understand who the leaders are and why while pointing out what still needs to be done. The **AI and Democratic Values** index gives me hope that AI policy efforts can improve human rights, social justice, and dignity.”*

- Professor Ben Shneiderman, author, *Human-Centric AI* (Oxford 2022)

*“An excellent report, a handy tool for the community, and a reference to see the nexus between AI and democratic values.”*

- Leyla Keser, Istanbul Bilgi University

*“A unique comparative of AI policy across the world. The Artificial Intelligence and Democratic Values report does not just provide a comprehensive perspective on the evolution of AI policy but also contribute to the underlying relationship between AI and democracy.”*

- Professor Oreste Pollicino, Bocconi University

## GOVERNING BOARD AND STRUCTURE

CAIDP is managed by a Board of Directors that meets quarterly to review the organization's program activities, finances and fundraising, policies, and management. Board members serve a three-year term. Officers are elected for a one-year term.

### Board of Directors and Officers

## ELIGIBILITY TO RECEIVE DEDUCTIBLE CONTRIBUTIONS

CAIDP was incorporated as a non-profit, educational organization in Washington, DC, in April 2021 and received a favorable tax-exempt determination by the IRS in December 2021. CAIDP's EIN is 86-3350258. CAIDP's financial information, tax determination, and Certificate of Good Standing are available on the CAIDP website.

The work of CAIDP is made possible by the voluntary contributions of an expert group of AI policy researchers around the globe and the donations of private individuals and charitable foundations. CAIDP does not receive support from governments or technology companies and is not aligned with political parties.
